

**BELT**  
Profesionálna hygiena

**OBJECT HYGIENE  
SPECIALIST**

# Introduction of a company

Our company BELT has been on the Slovak market since 1991. During that time, we have implemented a number of successful projects for domestic as well as international companies.

The company in 1994 gradually transformed into BELT SLOVAKIA (professional hygiene) and BELT & AT (gaskets for refineries).

In 2001 BELT SLOVAKIA expanded its operations to Hungary as BELT Hungary, and in 2007 it established a cleaning division.

We assume that each client is different, has its priorities and goals. Therefore, we approach each client individually and look for optimal solutions for his needs.

We prefer long-term cooperation, where we are able to offer flexibility, initiative, responsibility and creativity with a high level of services based on good knowledge of the market, client priorities and our products.

Our goal is to provide hygiene solutions and services that will help you more easily achieve your business goals and so that we can provide them on time and at an affordable price.

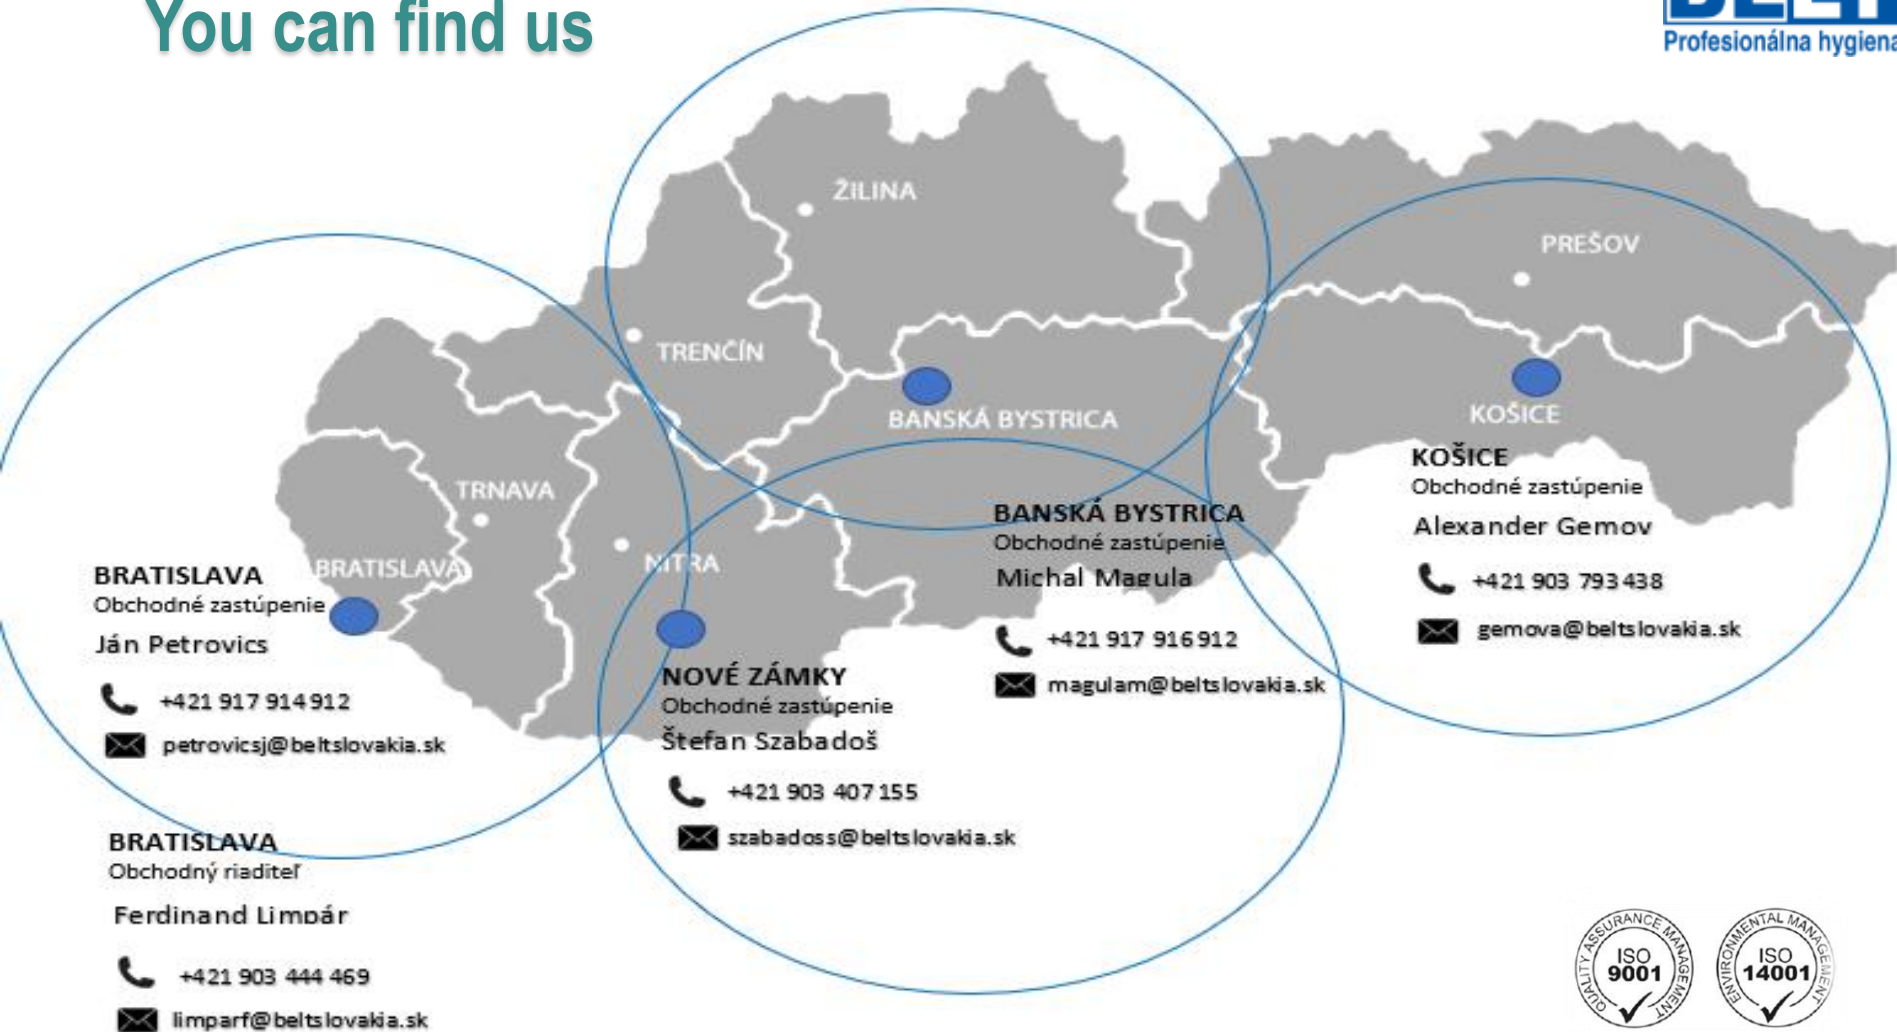

We guarantee quality services within ISO standards and quality products within valid Slovak legislation and with respect to the environment.

**Ferdinand Limpár**

Sales director  
in the company since 1998
